

WIRELESS MUSIC STREAMER

StreamPod

Upgrade your hi-fi system
and active loudspeakers

What is StreamPod...

StreamPod is a small device that plugs into your hifi system, amplifier or active speakers for streaming music through your WiFi network.

Once set up, simply use your phone, tablet or laptop to stream your favorite music to the speakers in the house.

Upgrade your old hi-fi without replacing it ...

StreamPod will integrate with your existing amplifier and HiFi system to open up your listening possibilities and transform the way you listen to music on your audio system.

Connect StreamPod with your existing HiFi system and enjoy high-quality music streaming from your iPhone, smartphone or tablet.

In any room or every room

Play a different song in the livingroom, bedroom, even bathroom, or the same track in every room, or play some dance music at the party - all controlled by the multiroom Podspeakers App.

Multiroom streaming

Tune into a radio station in kitchen, play a song from online music service to bedroom, stream local music from your phone memory to living room in simultaneous way.

Group different devices to different zones, each zone can play different songs.

Choose left channel, right channel and stereo mode on the application.

Set the alarm to wake up your favorite music or radio station automatically in one room or all rooms.

Listen to your favorites, anytime

Listen to music, radio and podcasts from Spotify, Tidal, TuneIn... and more coming, there is no end to the music you can enjoy.

Streaming music is easy

Install the Podspeakers App on your phone or tablet and stream music instantly to your speakers or hifi system.

Search, play, pause, queue songs and set the volume right from your phone – anywhere in the house.

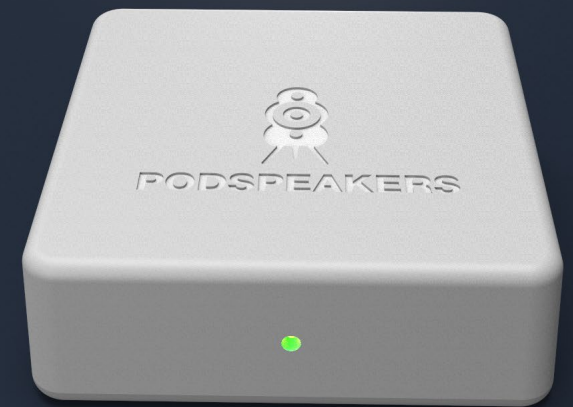

Connects to your active speakers or hifi amplifiers.

StreamPod does not require technical or wireless expertise. Connect to your home WiFi network with the Podspeakers App which provides simple on-screen and voice prompts.

With few steps, you will be playing music in minutes.
