

DIVA 660

Indiana Line – an italian brand with traditions

Indiana Line has been famous for producing loudspeakers since 1977. This brand is distinguished from the competition by the optimized production process and the rational use of components, which ensures excellent quality of workmanship and sound.

Let yourself be surprised by the perfectly controlled sound

The finely tuned, three-way Diva 660 floorstanding loudspeaker provides excellent resolution and the naturalness of voice reproduction, with a quick and precise impulse response. The listener can count on warm and deep bass, which complement the clear and rich midrange, perfectly blending with the natural and detailed high frequencies. Moreover, the loudspeaker offers extraordinary momentum and fantastic sound control, enviable by similarly sized constructions.

Trust many years of experience in developing loudspeaker technology

The 26-mm tweeter is attached to the Diva 660 loudspeaker through a soft rubber cover, which significantly reduces vibrations transmitted from the cabinet. It has been equipped with a radial rear chamber that uses two different types of sound damping materials.

The stiff and light midrange driver cones, with a diameter of 140 mm, are made of Curv material – woven, extruded polypropylene with high damping. A pair of 180 mm cellulose woofers placed below ensure a warm and full low frequency sound, as well as amazing dynamics. The magnetic circuits of all

drivers use an aluminum ring which reduces non-linearities, maximizing resolution also at high volume levels.

Choose the best solution for your interior

Diva 660 has amplifier loading impedance between 4 – 8 ohms, and the dedicated amplifier power is 30 – 170 W. The loudspeaker is recommended for larger rooms – of 12 to even 30 m², where it will certainly at once become a decoration.

Be mesmerized by industry-leading design

The Diva 660 loudspeakers are finished in an elegant black high-gloss lacquer, diversifying the decor of any interior. The double speaker terminals enable bi-spinning or bi-amping.

The most important features of Diva 660:

- 3-way acoustical floorstanding design
- Crossover frequencies: 300 Hz and 2,8 kHz
- 140 mm midrange driver with Curv cone
- 2 x 180 mm bass driver with natural cellulose pulp cone
- 26 mm silk dome tweeter
- Bass reflex cabinet with a port in the base
- Frequency response: 35 Hz to 22 kHz
- Bi-amping / bi-wiring capability
- Black piano lacquer finish
- Suggested amplifier power: 30 – 170 W
- Sensitivity: 92 dB (2,8 V / 1 m)
- Dimensions (H x W x D): 950 x 230 x 300 mm
- Weight: 17,2 kg
